

INNOVATIVE PRECISION

INTELLIGENT MACHINING SOLUTIONS

WE HELP KEEP AMERICA
SAFE MOVING AND HEALTHY

Innovative Precision is proud to announce the addition of a new Makino a51nx Horizontal Machining center for 2016! The new machine is 4 axis capable and adds a superb combination of speed and accuracy to our lineup of production machinery. This will help increase our milling capacity and significant value to our customers machined parts requirements.

Makino a51nx

With 4 Axis milling capability
133 Tool Magazine
14,000 RPM Spindle
2 pallet Changer
Maximum Workpiece 24.8" Diameter x 35.4"

a51nx Built for High Performance Machining

The Makino a51nx is a 400mm horizontal machining center that builds on the highly successful a51 platform with key high performance machining technologies that take productivity, accuracy and machine reliability to the next level.

The 14,000-rpm high-speed, high-power spindle features 240 Nm of torque, making it well suited for ferrous and non-ferrous part production.

1G axis acceleration and a standard direct-drive motor B-axis minimizes non-cut times, whereas a robust casting design and roller-type linear guides ensure the entire a51nx work envelope can be effectively utilized.

Additionally, one-piece way covers (X and Z) and a dual-supported tool-change arm provide the foundation for industry-leading reliability and high performance machining capability.
