WE HELP KEEP AMERICA SAFE, MOVING AND HEALTHY

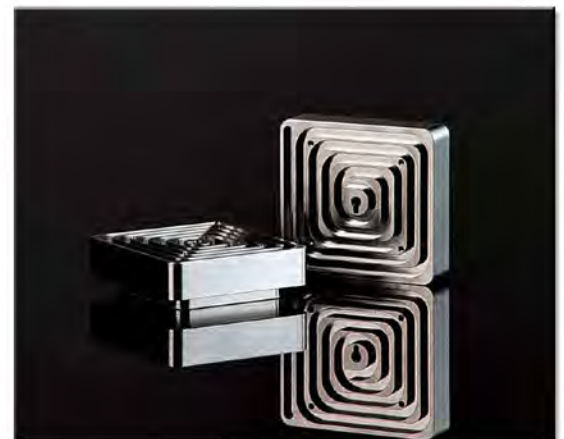

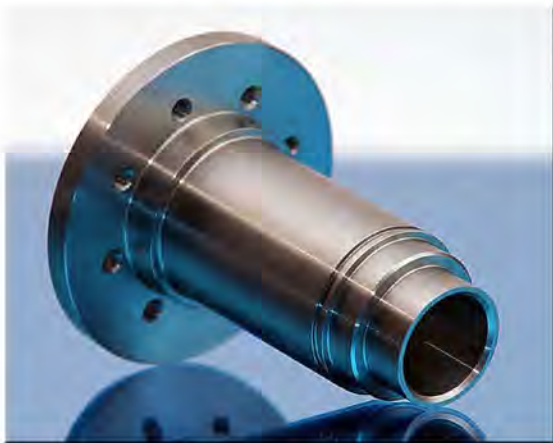

Innovative Precision is a 21st Century CNC machine shop utilizing the latest technology in precision machining, and has always focused on providing the highest quality machined parts at competitive prices

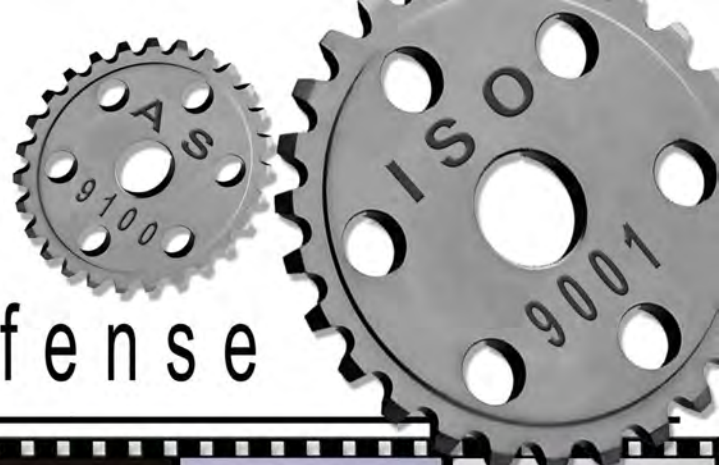

Bryan Cardon founded the company in 1998 in a small one bay garage in Ogden, Utah and has since expanded into its own 23,000 square foot facility with plans to double in size over the next 5 years. Bryan has 20 years experience in precision machining and project management for a variety of industry applications, and is the General Manager of IP.

Bryan Cardon
Owner / General Manager

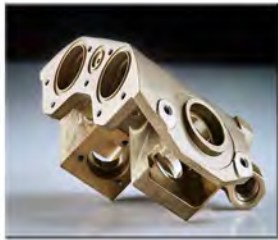

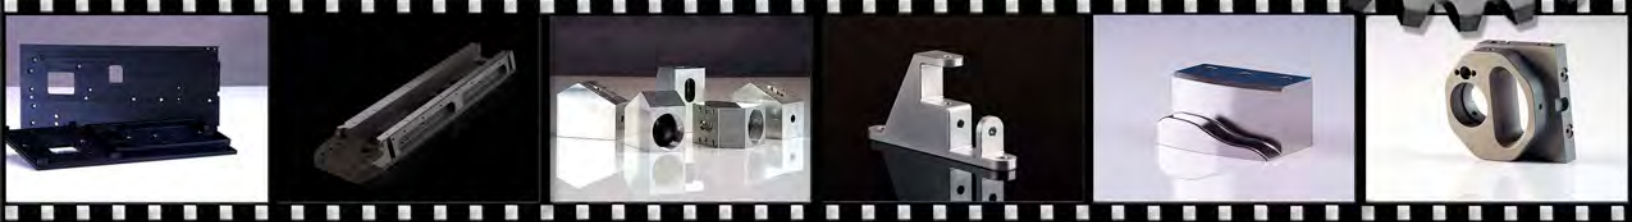

Since its inception, Innovative Precision has established itself as a leader for precision machined components, and has been working on a "partner level" with companies from a wide variety of industries for many years. IP maintains both AS9100 and ISO9001 certifications to ensure quality and consistency throughout the manufacturing process. We have the experience and equipment to manage production quantities and are positioned to grow with customer demands.
